Caesar Rodney School District Announces Start Of District-Wide Strategic Plan
Elementary Realignment Plans Modified

Camden, DE – The Caesar Rodney School District (CRSD) announced today the start of a district-wide strategic planning process.

CRSD has partnered with the Insight Education Group to develop a new strategic plan that will guide the district's priorities over the next five years. As a key to this important work, CRSD is seeking stakeholder feedback in the form of a survey. The survey has been designed to ask the Caesar Rodney community to share their thoughts on areas the district should prioritize over the next five years. Collected responses will help to craft the basis of the strategic plan by evaluating feedback on possible priority areas, as well as what the district should start, stop, or continue prioritizing moving forward. Students, parents, community members, and district employees are encouraged to participate. All responses will be kept anonymous and confidential. The survey can be found on the district website at https://www.crk12.org/Page/3862.

In addition to completing the stakeholder survey, there are two other ways to become more involved in the strategic planning process. CRSD is looking for individuals interested in either serving on the steering committee or participating in focus groups. The steering committee will serve a critical role in drafting the strategic plan and serving as ambassadors for the process to ensure transparency across the district. Focus groups will provide feedback on components of the drafted plan before it is finalized. More information on both groups can be found within the survey on the district website.

Superintendent Dr. Christine Alois explained, “We look forward to working together to develop a plan that addresses our community’s hopes and dreams for the future of the Caesar Rodney School District.”

-MORE-
With the transition to a new superintendent and the launching of the district-wide strategic planning process, CRSD will be modifying its original Elementary realignment plan - first presented last fall - to address immediate needs while creating the least amount of movement and impact on students, families, schools and the community. This modified realignment will also create opportunities to develop prototype programming for future implementation. Information related to these updates may be found at https://www.crk12.org/Page/3863. The district will reach out directly to those impacted to share the changes and welcomes continued discussion as they reset and move forward together into the 2022-23 school year.
