CAESAR RODNEY SCHOOL DISTRICT

VOLUNTEER CONDUCT

The Caesar Rodney School District Board of Education believes that one of the best methods of serving in a position of a school volunteer or chaperone is that of setting a good example. The Board expects that all school volunteers and chaperones will strive to set the kind of example for students that will serve them well in their own conduct and behavior which will contribute toward and appropriate school atmosphere. To that end, in dress, conduct, and interpersonal relationships, all volunteers and chaperones should recognize that they are being continually observed by students and that their actions and demeanor will be reflected in the conduct of students. The personal life of a volunteer or chaperone will not be the concern of the district unless it prevents the individual from effectively and positively performing assigned functions during work hours, or if some aspect of it violates some aspect of local, state, or federal laws. No volunteer or chaperone will commit or attempt to induce students or others to commit an act or acts or immoral, unethical, or illegal conduct, which may be harmful to others or bring discredit to the District. Immoral, unethical, or illegal conduct on the part of any volunteer or chaperone will constitute grounds for disciplinary actions, up to and including termination of their status as a volunteer or chaperone.

I have read and understand the expectations outlines in the aforementioned policy and will uphold the duties I have been assigned.

DELAWARE DEPARTMENT OF EDUCATION¹
CONFIDENTIAL TUBERCULOSIS (TB) HEALTH QUESTIONNAIRE FOR
VOLUNTEERS IN PUBLIC SCHOOLS

All school students, employees, and volunteers are required to be screening for Tuberculosis (TB)². The purpose of this requirement is to safeguard school-aged children from exposure to TB in the school setting. This questionnaire is designed to identify volunteers who MAY have been exposed to TB and thus need further testing. A school designee will collect and monitor the Health Questionnaire, which will be stored in the School Nurse's office in a confidential manner. The questionnaire must be completed every five years. The volunteer may prefer to provide evidence of TB testing in lieu of completing the questionnaire.

Please consider the following questions and circle only **ONE** response in the box below ³:

Can you answer "yes" to any of the questions below?	
<ol style="list-style-type: none">1. In the past five years, have you lived or been in close⁴ contact with anyone who had active, infectious TB disease?2. Do you currently have any of the following symptoms which are unexplained and which have lasted at least three weeks? Cough Fever Night sweats Weight loss3. Have you ever had a positive HIV test?4. In the past five years, have you ever used illegal intravenous drugs?5. In the past five years, have you been incarcerated?6. In the past five years, have you been homeless which resulted in living in a shelter or with others outside of your family, who were homeless?7. For the next two questions, refer to the TB-Endemic Countries list provided by the Delaware Division of Public Health.<ul style="list-style-type: none">• In the past five years, have you stayed/lived in one of these countries for 1 month or longer?• In the past five years, have you lived or been in close contact with someone who stayed/lived in one of these countries for 1 month or longer?	YES <input type="checkbox"/> NO <input type="checkbox"/>

If you checked YES, you are **required** (within 2 weeks) to provide verification from a licensed health care provider or the Division of Public Health that there is no communicable threat.

Have you ever had a positive skin test for tuberculosis? <input type="checkbox"/> Yes <input type="checkbox"/> No
If you checked yes, you are <u>required</u> to provide documentation related to current disease status prior to your assignment as a volunteer.

These requirements are for the safety of our school and for your personal health. Screening for tuberculosis is recommended by health professionals for any individual who is at risk. Routine screening, using a Mantoux tuberculin skin test or a TB blood test, such as the Quantiferon Gold TB Test, can detect if a person has been exposed to tuberculosis. Early identification of infection and completion of a course of antibiotic treatment significantly reduces the chance of developing active TB disease over the lifetime of infected individuals.

If you have any questions about your risk of infection, please speak with your healthcare provider or plan to discuss it at your next examination. For additional information, you can contact the Delaware Division of Public Health TB Elimination Program at 302-744-1050

¹Developed in collaboration with The Delaware Division of Public Health, with revisions 7/2010 and 7/1/13.

²Regulation 805 can be accessed at <http://regulations.delaware.gov/AdminCode/title14/800/805.pdf>

³To maintain confidentiality of medical information, the volunteer should not provide an individual answer to each question. The volunteer's response of "yes" indicates that at least *one* of the seven questions is correct, which means a possible exposure. The volunteer should not indicate which one. The volunteer may prefer to provide evidence of TB testing in lieu of completing the questionnaire.

⁴CDC describes "close contact" as prolonged, frequent, or intense contact with a person with TB, while he/she was infectious.
