April 1, 2020

As we continue to abide by Delaware’s social distancing guidelines, schools remain physically closed for both students and teachers. To help provide continuity in student learning, here is a learning packet focusing on skills taught throughout the current school year. The learning packet has daily review items covering reading/Language Arts, Mathematics, science, social studies, and the arts. Students should work through the packet throughout the week at a pace that works for you and your child. In addition to the learning packet, it is recommended that your child does the following independent activities:

- Read for 20 minutes per day
- Practice Math Fluency (addition facts, multiplication facts, etc.) for 10 minutes per day
- Work on iReady (Grades 1-5) for reading and math for 30 minutes per day. Your child should be able to log into “Clever” at clever.com/in/crk12 in order to access your child’s iReady account.
- Participate in physical activity for 30 minutes per day

Next week, the Caesar Rodney School District will begin “remote learning.” This will entail your child’s teacher leading daily short reading and math lessons online virtually. These lessons will be accessed through Clever (for Kindergarten and 1st Grade) and Schoology (for Grades 2 – 5). This week, your child’s teacher will be contacting each family to reconnect with you and explain the format and schedule for remote learning. If your child is not able to participate in the district’s remote learning initiative then his/her teacher will continue to provide paper-pencil learning packets for him/her. These packets will be available through Schoology and at your child’s school. Teachers will also be available most afternoons, by telephone and email, to assist with the assignments and tasks found in the learning packets. Thank you for your support and patience during these unprecedented times. As a community, we will get through this together. Go Riders!

Stay Safe,

Tara Faircloth  
Director of Curriculum and Instruction  
Caesar Rodney School District
Week 2
3rd Grade
Independent Study Packet
Education.com

5 MORE Days of Independent Activities in Reading, Writing, Math, Science, and Social Studies
Helpful Hints for Students and Families

Materials You Will Need:
- Pencils
- Extra paper or a notebook/journal. (You may put everything into one notebook if you like.)
- Colored pencils, markers, or crayons for some of the activities
- Internet access for online research
- You will need different materials for the optional Design Challenge

Directions & Tips
- There is a schedule for each day. You may complete the activities in any order. Social studies and science activities may take you more than one day to complete.
- Make sure to plan your time so that you don’t let things pile up at the end.
- Read the directions carefully before completing each activity.
- Check off each of the activities when you finish them on the activity menu.
- Make sure an adult signs the activity menu before you bring it back to school.

Introducing Mae Jemison, the Star

“It’s part of the imagination. All of science, all of space exploration - everything we do in the world is about imagination and using your creativity to expand beyond your normal boundaries.”
- Mae Jemison

Introduction
Have you ever used your imagination to make something happen? Like, fly down the stairs to the dinner table, or wave a magic wand to clean your room? Well, you’re not alone in using your imagination. Doctor Mae Jemison imagined herself in space as a child, and she is now famous for making that dream come true.

As an astronaut for NASA, Mae became the first African American female to fly into space. She was a mission specialist on the space shuttle Endeavour in 1992. Mae studied how living things act in space. She is also a doctor, researcher, teacher, and a businessperson.

Early Life and Education
Mae was born in Decatur, Alabama on October 17, 1956. She lived there until she was three years old, when her family moved to Chicago, Illinois. Her mother was an elementary school teacher, and her father was a carpenter. She has two older siblings, a sister and a brother.

When Mae was younger, she liked dance and science. She liked astronomy. She loved science so much she would help her brother and sister with their science projects. She also read books at the public library, especially about stars. Mae wanted to go to space. She never had any doubt that she would get there.

Mae won a scholarship to Stanford University in California. She was only 16 years old, but she learned a lot in her studies in science and in the arts. She double majored in chemical engineering and Afro-American studies. While on campus, she planned and performed in dance performances. After graduating from Stanford in 1977, she went to Cornell University Medical College in New York. In 1981, Mae became a doctor.
Introducing Mae Jemison, the Star

During summer breaks from school, Mae went to Cuba and Kenya to learn about medical care in other countries. Mae wanted to use her medical degree to help others. After her experiences abroad, she decided to join the Peace Corps in 1983. She served in the Peace Corps for two and a half years. During her time as a medical officer in the Peace Corps, she was able to use her knowledge of Swahili while working in West Africa. Not only does Mae speak English and Swahili, but she speaks Russian and Japanese as well.

Launching Her Way into the History Books
Over the years, Mae continued to think about her dream to go to space, so she applied to be an astronaut for NASA. Even though Mae’s first application was denied because NASA stopped taking on astronauts at the time, she didn’t give up! She applied a second time. In 1987, Mae was one of fifteen people chosen to become an astronaut out of 2,000 applicants.

Five years later, Mae worked on the STS-47 mission to study life in space. NASA had a joint mission with Japan for this flight. On the same mission was the first Japanese national to fly in space, Mamoru Mahri. Mae studied in space for eight days. Her experience in space was so important that she wanted to encourage more space travel.

Continuing Her Scientific Work
After leaving NASA, Mae started her own businesses. One business was a camp called “The Earth We Share.” It started through the Dorothy Jemison Foundation for Excellence, named after Mae’s mother in honor of her work as an educator. The camp helps kids learn more about science. Kids go to the camp from around the world. At the camp, young scientists get to use their imagination and share their ideas about future missions.

Mae currently lives in Houston, Texas. There she is leading the 100 Year Starship (100YSS) initiative through the United States Defense Advanced Research Projects Agency (DARPA). The goal of this DARPA program is to make sure human space travel to another solar system is possible within the next 100 years. In 2012, Mae’s team won a grant to research how to travel to other stars.
Introducing Mae Jemison, the Star

Combining Arts and Science
All throughout her life, Mae had an artistic side. She is trained as a dancer, choreographer, and actor. Using her training, she has appeared on television over the years. When she was younger, she looked up to Uhura, a female officer in the television show Star Trek. Her real life blurred with her childhood imagination as she guest starred in the television show Star Trek: The Next Generation. Mae jumped at the chance to play Lt. Palmer in one episode. This was another example of her childhood dream coming true. It was also another experience that showed Mae the importance of the arts in expanding her imagination.

In her TED talk in 2002, Mae said, “We need to revitalize the arts and sciences right now in 2002.” She says that understanding the arts can help young learners understand science better. Mae ended her TED talk by saying, “I like to think of ideas as potential energy. They’re really wonderful, but nothing will happen until we risk putting them into action.” She thinks it’s time to act; it’s time to teach the arts and science together.

There is no doubt that Mae used her imagination and worked hard to go beyond her normal boundaries. She is still trying to go beyond her earthly boundaries. The world, and maybe even a new star, is her oyster.

Directions: Answer the questions using evidence from the text.

1. What are some things Mae Jemison liked to do?

2. Why is Mae Jemison famous?
3. What is a challenge Mae Jemison had in her life?

4. What does Mae Jemison mean when she says, “I like to think of ideas as potential energy. They’re really wonderful, but nothing will happen until we risk putting them into action.” Use information from the text to support your answer.

5. Reread the last section of the biography. Do you think teachers should teach arts and science together? Why or why not? Do outside research to support your answer.

6. In all of the journeys in her life, whether they were on earth or outer space, Mae Jemison used her scientific knowledge to help others. Write about a career you would like to try that can help people, too.
Two Truths and One Lie: Mae Jemison

Read the three statements about Mae Jemison. Can you figure out which two statements are true and which one is false? Research using books, articles, or websites to confirm your answer. Circle the lie.

1. Doctor Mae Jemison joined the Peace Corps after earning her medical degree from Cornell Medical School.

2. When travelling on the space shuttle Challenger, Mae Jemison became the first African American female astronaut to enter space.

3. Jemison grew up in Chicago, and that is where she continued her love of dance and studies in science.

Answer these questions after doing some research.

1. Fix the false statement so that it is now true.

2. Choose a fact about Mae Jemison you think is important.

3. Explain why you chose that fact to share.

4. On a separate sheet of paper, write a paragraph about Mae Jemison using more than two sources for information (like a website and an article).
**Its or It’s?**

Circle the correct word in each sentence.

- **Its** is a possessive pronoun.
- **It’s** is a contraction that means it is.

The tiger licked **its** it’s paw.

I wonder if **it’s** it’s going to rain tomorrow.

Its **It’s** time to go to school.

My cat and **its** it’s kittens are taking a nap.

**Its** It’s going to be a long walk to the train.

That dress is beautiful! **Its** It’s color is perfect for you.

I’m glad **its** it’s sunny outside today.

Your puppy is so cute, what’s **its** it’s name?

Hurry up and catch the train! **Its** It’s coming!

Have you seen my toy? **Its** It’s not in **its** it’s box.
Solar System Subtraction: The 6th Planet

What's the 6th planet from the sun? Find out by finding the difference, then using the letters to spell out the name.

B: 94 - 74
G: 47 - 21
N: 78 - 45
R: 98 - 12
A: 49 - 13
U: 92 - 70
K: 98 - 21
T: 97 - 55
S: 53 - 40
C: 77 - 61

It has sixty one known moons. It is best known for its rings.

**Who Am I? Women in Space**

**Directions:** Read each description below. Then, use books and digital research tools to help you match the person to the description. Cut and paste the person's image and name to the correct description. Then, conduct further research using the instructions below.

**Research Directions:**
- Research one of the women online and/or by finding books at the library.
- Next, create a blog, piece of writing, poster, or artwork to teach others about what you learned.

Kalpana Chawla  | Mae Jemison  | Sally Ride  | Stephanie Wilson
MAKE A PLANET

Billions and billions of stars thrive in our universe, and many more planets orbit around those very stars. Astronomers and space enthusiasts hope that one day we will find a planet like Earth and work towards inhabiting it.

Scientists have just discovered a new planet. Draw a picture of it and come up with ways that humans can live on this planet in harmony with its environment.

What is the name of your planet?

How will people be able to live there?

What steps will you take to protect the planet’s environment?
Compound Sentences

A compound sentence is made up of two or more complete sentences connected by a conjunction (a joining word) such as and, but, or so.

Tom walked through the haunted house, but he wasn’t scared at all.

Create your own compound sentences on the lines below by combining a sentence from column A with one from column B and connecting them with a conjunction. You can use sentences more than once.

A

Jan went to the carnival.
Jan wanted to ride the roller coaster.
Jan played arcade games.
Jan tried to win a stuffed bear.
Jan started to get hungry.

B

She had a great time.
She rode on all the rides.
She didn’t have enough money.
She didn’t stay for long.
She stood in a long line.
It started to rain.
She won a kewpie doll.
She bought a hot dog.

example

Jan went to the carnival, but she didn’t stay for long.

1. 

2. 

3. 

4. 

5. 

6.

</tr>
<tr>
<td><strong>Math</strong></td>
<td>Collect data around the house for this graph.</td>
</tr>
</tbody>
</table>
Why does the earth spin?

The Earth spins because there is nothing in its way to stop it!

Long before our planet was a solid sphere, there was just a mass of dust and gas. Earth was formed when all this matter began to spin. That's how most planets and stars are formed!

Thousands of years later, the spinning cloud of dust and gas became our planet, and thanks to our position in the Solar System, neither the sun nor the moon had the power to slow Earth's rotation enough to halt it completely.

Imagine the Earth did not spin. How would this affect your life?

★ Remember that the Earth's rotation is responsible for the sun rising and setting. If the Earth did not spin, parts of our planet would spend half a year in darkness and another half a year in full sunlight.
CREATIVE WRITING

Would you rather... Travel through time, or travel through outer space?
Possessive Pronouns

Pronouns take the place of nouns in a sentence. A possessive pronoun shows ownership.

Circle the possessive pronouns.

my your you its our her him
his your their there whose you

Rewrite each sentence to include a possessive pronoun with the noun.

I saw the dog that belongs to you.

The coat that belongs to me is warm.

This is the house that belongs to Sue.

Tim’s brother is five years old.

The horse’s leg is sore.

Dad is driving the car that belong to us.

1. This room belongs to my sisters. This room is _____________.

2. Those glasses belongs to you. Those glasses are _____________.

3. These books belong to Bruce. These books are _____________.

4. Two of these dollars belong to me. Two of these dollars are _____________.

Collecting Data Sets

Collecting data is an important part of math and science. For practice, let’s use the home or classroom as an investigative environment. Fill in the chart below by counting up the items that you see in your home or classroom.

<table>
<thead>
<tr>
<th></th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>7</th>
<th>8</th>
<th>9</th>
</tr>
</thead>
<tbody>
<tr>
<td>desks</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>books</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>windows</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>chairs</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>lamps</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>pictures on walls</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>shelves</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The data collection process is more than just counting. For example, the set of desks in a classroom will likely include a large number of student desks, but it will also include the teacher’s desk and maybe other desks or tables.

How do you record the teacher’s desk? It’s not a "student" desk, but it still belongs in the set of desks. How do you record the difference?

In the set of shelves, other choices will have to be made. What if some of your shelves are attached to the walls, and some are not? They all belong in the set of shelves, but how will you record the difference?

Collecting Data Sets

Think of different ways to organize each set into categories. Some sets may have only two categories, but others may have a lot. Record the number of items in each category using tally marks.

</tbody>
</table>
Part of Project Gemini, Gemini 4 launched on June 3, 1965. Project Gemini was part of the U.S. space program to explore space. The project followed Project Mercury, which introduced manned space flight. The Gemini missions were important, as they had two astronauts on board each flight.

The astronauts on Gemini 4 were Edward White and James McDivitt. The Gemini 4 mission performed many things for the first time:
- The first flight to go over one day. It was important for scientists to know if humans could stay in space long enough to travel to the moon.
- The first flight to be managed from the new Mission Control Center in Houston, Texas.
- The first flight to try and meet up with another spacecraft. While this was not successful, it gave scientists valuable information.
- Most importantly, Gemini 4 was the first flight where an astronaut would leave the capsule and go into space. Called a space walk, this was a dangerous, but important, objective of the mission. On June 3, for 20 minutes, Edward White left the capsule and floated in space. He was attached to the capsule by a cord. White took photographs of Earth during his space walk.

Gemini 4 splashed down safely on June 7, 1965 after four days in space. It had orbited the earth 66 times.

---

**Q&A**

How many astronauts were on board Gemini 4?

What is it called when an astronaut leaves the command module and floats in space??

What year was Gemini 4 launched?

How many days was the Gemini 4 in space?
WHAT IS A PLANET?

There wasn’t a definition written for planet until 2006! According to the official definition, a planet is a celestial body moving in an orbit around a star that has no other bodies of similar size near it. When telescopes were invented and people began to look at the sky, they noticed some things they could see in the sky looked like stars, but acted differently. They appeared to be in different places at different times of the year. We later came to realize that these were the planets in our solar system.

We currently have eight planets and five dwarf planets in our solar system. A dwarf planet is an object that orbits around a star but is not powerful enough to have moved other objects away from it. Before 2006, there was another planet called Pluto. When scientists wrote out the definition of a planet, they realized Pluto did not fit. Pluto was renamed a dwarf planet in 2006.

Look at the astronomy words below. Use books or the internet to write a definition for each word.

star

orbit

mass

satellite

moon

dwarf planet
Singular Possessive Nouns

A possessive noun shows ownership. Most singular possessive nouns are made by adding ‘s to them.

Rewrite each sentence to include a singular possessive noun.

1. She dropped the toy of the baby.  She dropped the baby’s toy.

2. He painted the house of my dog.

3. I wore the cap of my friend.

4. The class of Mr. Gee is in the hall.

5. The singing of Mom woke me up.

6. I washed the windows of the car.

Complete each sentence by adding a singular possessive noun. Add articles as needed.

1. Mrs. Brooks shook ___________ the president’s ___________ hand.

2. I went with ___________ sister to the zoo.

3. She threw ___________ ball over the fence.

4. He searched through ___________ rooms for the book.

5. Carlos rode ___________ bicycle around the block.

Find worksheets, games, lessons & more at education.com/resources

   Saturn

Fill-in-the-Blank
If I Had a Million...

What would you like one million of? Fill in the blanks below to show what you would do with it!

Example: If I had a million cats I would teach them how to fetch and dance. And then, I would open a cat circus, the first in the world, for all my friends to see. I would give Sasha 15 cats, and she would open a cat cafe so people who didn’t have cats could come and play.

If I had a million ____________________________ I would ____________________________

______________________________

And then, I would ____________________________

______________________________

I would give ____________________________ and they would ____________________________
There, Their, or They’re?

Complete each sentence with there, their, or they’re.

The words there, their, and they’re are often confused.

There is used to refer to a place. Example: Fred is over there.

Their means belonging to them. Example: This is their cat.

They’re is a contraction meaning they are. Example: I hope they’re coming.

They went to visit ____________ aunt.

Please put your coats ____________.

__________ house is almost one hundred years old!

Have you been ____________ yet?

__________ looking for ____________ lost cat.

Tomorrow, ____________ throwing a graduation party.

__________ going to Hawaii for summer vacation.

__________ is no more milk left.

What did you see over ____________?

On Sunday, ____________ family plays tennis.

Eva played with ____________ new puppy.
Runaway Signs

The plus and minus signs have run away! Now these equations are missing the plus and minus sign. Write the correct sign in each box.

8 □ 12 = 20
11 □ 6 = 5
7 □ 9 = 16
100 □ 75 = 25
67 □ 22 = 45
34 □ 13 = 21
150 □ 50 □ 20 = 120
12 □ 12 □ 20 = 4
20 □ 32 □ 4 = 56

42 □ 10 = 32
12 □ 12 = 24
55 □ 20 = 75
87 □ 2 = 85
20 □ 22 = 42
56 □ 16 = 40
